Part Two: How to Apply This Model of Care

"We shall never know all the good that a simple smile can do".
~Mother Teresa

Presented by: Holly Jorgensen, Collaborative RDH, Executive Director

Let's Smile, Inc.

Let's Smile, Inc. is a nonprofit 501(c)3 organization based in Steele County since 2013.

Mission: is to provide, promote, educate, and empower families through the power of preventive dental care.

Outreach: daycare centers, preschools, schools, and community organizations. We provide care for children and adolescents up to the age of 19.

Purpose: Change lives by improving access to oral health care, increasing oral health literacy, and raising awareness about the importance of oral health's impact on overall health, especially to those most vulnerable.

Let's Smile, Inc.

PROGRAMS:

- Oral Health Education
- Clinical Preventive Dental Services

Oral Health Education Program

Let's Smile, Inc. provides age appropriate lesson plans and presentations to the collaborative partners

Oral Health Education Program

* *Infants and Children*: Dress up like the Smile Fairy to provide a 20-30 minute interactive school presentation where children learn about why they have teeth, how to take care of their teeth and how it affects their overall health. We distribute age appropriate toothbrushes and toothpaste for every child.

Per smile Fairy,

You are funny! Thank you for

the gifts!

Oral Health Education

Adolescents and Adults: Promote and educate about the importance of maintaining a healthy mouth through brushing, flossing, using fluoride, and regular dental visits. We address oral health topics such as gingivitis, what oral health products to use, oral piercings, the effects to the mouth from smoking and drug use, the importance of mouth guards during sports, and the results of soda and bad nutrition to the health of the teeth. We distribute age appropriate toothbrushes and toothpaste for every participant.

CLINICAL PREVENTIVE DENTAL SERVICES:

Let's Smile, Inc. increases access to clinical preventive dental professional services to children & adolescents for those that have limited or no dental insurance due to low income by providing the following services:

- **Basic Screening Surveys (BSS) to assess for untreated decay, check for oral cancer, report any signs of abuse or neglect, and inspect for the proper development of children and adolescent's teeth.**

•Prophylaxis (dental cleaning) to remove plaque, calculus, bacteria, and stains for children and adolescents up to 19 years old.

•Administer fluoride varnish treatments to strengthen the enamel of teeth for children and adolescents up to 19 years old.

•Apply sealants

•Provide oral hygiene instructions.

•Provide take- home bags with toothbrush, floss, and toothpaste per child; take home fluoride rinse will be provided if indicated by a high cavity rate.

•Provide nutritional education affecting dental health

•Following bi-annual visits, provide evaluation, advisement, and documentation of assessed dental concerns to parent/guardian and the school nurse/social worker if requested.

•Provide referrals to general dentist or dental specialists for follow up X-rays, Exam, and necessary dental treatment.

SMILE!
